About the Lab

Singh Lab at Kobe City University of Foreign Studies focuses on environmental issues across plastics, waste management, climate change, sustainable tourism, and community engagement.

Vision

Integrate research, teaching, and local action to reduce environmental risks and improve well-being.

Approach

Mixed methods, field-first data, and policy-relevant outputs aligned with SDGs.

Focus

Plastics, waste, climate, and sustainable communities in Japan and Asia.

People

Profiles of students from the last 3 years. Updated annually.

Plastics

Research Themes

Explore our thematic areas and representative topics.

Plastics

- Marine litter education
- Microplastics monitoring
- Plastic-climate nexus

Waste Management

- Campus compost & LCA
- Open burning mitigation
- Municipal solid waste planning

Climate Change

- Heat risk perception
- Mitigation co-benefits
- Community resilience

Sustainable Tourism

- Green spaces & well-being
- Local revitalization
- Sustainable tourism practices

Other

- Fair trade impacts
- Biodiversity & plastics
- Policy design & SDGs

Publications

Selected publications and theses.
